

Abhijeet Divekar

Full Stack Developer | Angular | ASP.NET Core | Azure

+91 7620649170 | abhijeetdivekar744@gmail.com | GitHub | LinkedIn

Professional Summary

Full Stack Developer with **1.9+ years of experience** developing web applications using **Angular, ASP.NET Core, ASP.NET MVC, C#,** and **SQL Server**. Experienced in building RESTful APIs, implementing role-based access control (RBAC), and developing responsive Angular user interfaces for CRM-based applications. Hands-on experience working with **Microsoft Azure**, including Azure Functions and Azure Cosmos DB. Strong understanding of API-driven development, database management, authentication, and application performance optimisation in Agile environments.

Technical Skills

- **Frontend:** Angular (v14+), TypeScript, JavaScript, RxJS, HTML5, CSS3, Bootstrap, Ionic, jQuery, AJAX
- **Backend & .NET:** C#, ASP.NET Core Web API, ASP.NET MVC, Entity Framework Core, LINQ, ADO.NET, Azure Functions, JWT Authentication
- **Cloud:** Microsoft Azure (App Service, Cosmos DB)
- **Auth & Security:** JWT, .NET Core Identity, Role-Based Access Control (RBAC)
- **Database:** SQL Server, Azure Cosmos DB, Stored Procedures, Indexing, Query Optimisation, Performance Tuning
- **Architecture & Design:** Layered Architecture, MVC, Repository Pattern, Dependency Injection, SOLID Principles, OOP
- **Tools & Workflow:** Git, Visual Studio, VS Code, Swagger, Postman, SSMS, Agile/Scrum

Work Experience

Reymould Technology Solutions Pvt. Ltd.

Mar 2026 – Present

Full Stack Developer

Project: TripMeld CRM

[ONGOING]

Technologies: Angular, ASP.NET Core Web API, Azure Functions, Azure Cosmos DB

- Developed **Client Super Admin** and **Reporting Manager** hierarchy modules with role-based access control (RBAC) for a multi-tenant CRM platform serving **140+ organizations**, enabling secure user administration and hierarchical access management.
- Built and integrated **RESTful APIs** using ASP.NET Core Web API with Angular SPA components to support dynamic lead management and itinerary workflows.
- Implemented **Account Status toggle** functionality to manage real-time user login access, enforcing authorization at both API and UI layers.
- Designed and implemented data models using **Azure Cosmos DB** and serverless logic via **Azure Functions** for scalable, distributed operations.
- Consumed and tested RESTful APIs using **Postman** to ensure endpoint correctness and reliability.
- Participated in **Agile/Scrum** sprints including daily stand-ups, sprint planning, and code reviews.

Gaya Software and Technology

Aug 2024 – Feb 2026

Software Developer

Key Contributions:

- Developed responsive **Angular** UI components integrated with ASP.NET Core Web APIs, delivering dynamic client-facing web applications using MVC, Bootstrap, and jQuery.
- Implemented **JWT-based authentication** and role-based authorization (RBAC) for secure, granular access control across multiple application modules.
- Built and maintained data access modules using **ADO.NET** with stored procedures for high-performance, reliable database operations.
- Optimised **SQL Server** queries, indexes, and stored procedures, improving overall API response time and system performance by approximately **25%**.
- Implemented centralised **exception handling middleware** and structured request/response models in ASP.NET Core Web API for consistent error management and input validation.

Projects

GST Society 360

Team Member

Technologies: ASP.NET MVC, C#, SQL Server, ADO.NET, Bootstrap, Razorpay API

- Developed **Accountant** and **Worker Payment** modules for end-to-end financial management operations.
- Integrated **Razorpay/UPI** payment gateway with automated receipt generation for online and offline transactions.
- Developed structured credit/debit transaction and **audit logging** workflows for financial transparency.
- Optimised SQL queries and stored procedures, reducing manual accounting effort by approximately **40%**.

Grow Mind – Learning Management System (LMS)

Team Member

Technologies: Angular, ASP.NET Core Web API, Entity Framework Core, SQL Server

- Developed dynamic **Angular** UI components integrated with RESTful APIs for course and user management.
- Implemented **Reactive Forms** with client-side validation, pagination, and filtering for large dataset handling.
- Designed secure **ASP.NET Core Web APIs** with role-based content access using Entity Framework Core (Database First).
- Improved application responsiveness using **asynchronous programming** (async/await).

HR Horizon – HR & Recruitment Desktop Application

Team Member

Technologies: C#, WinForms, ADO.NET, SQL Server

- Developed data access logic using **ADO.NET** and SQL Server stored procedures for efficient data handling.
- Built employee management and recruitment workflow functionalities within the desktop application.
- Implemented **role-based access control** and event management features for HR operations.

Education

Bachelor of Computer Science

2024

Savitribai Phule Pune University (SPPU)

First Class
